INDEX TO VOLUME 25 1990

Index to Authors and Contributors

BEGHINI, M. *Paper* Residual stress modelling by experimental measurements and finite element analysis, 103
BENNISON, S. *Technical Note* Finite element analysis of weld distortion in carbon and stainless steels, 51
BERGER, J. R. *Paper* An improved strain gauge method for measuring K_{ID} for a propagating crack, 177
BERTINI, L. *Paper* Residual stress modelling by experimental measurements and finite element analysis, 103

CHAU, F. S. *Paper* Direct determination of derivatives of holographically recorded displacement by an optical diffraction technique, 141
CHEN, T. L. *Paper* Photoelastic investigation of transient thermal stresses of two interacting defects, 215

DALLY, J. W. *Paper* An improved strain gauge method for measuring K_{ID} for a propagating crack, 177
DAY, B. V. *Paper* Photoelastic investigation of stresses at an oblique hole in a thick flat plate under uniform uniaxial tension, 157
DEVINE, N. F. *Technical Note* New approximate formulae in the torsion problem, 127
DRAGONI, E. *Paper* Effect of nut compliance on screw thread load distribution, 147

FANG, J. *Paper* Application of moiré interferometry to a contact problem, 229
FESSLER, H. *Paper* Internal stresses at the saddles of YT tubular joints with three different weld fillet shapes, 85
FOK WING-CHAU *Technical Note* On the evaluation of stress and contact force in a beam due to a prescribed deflection, taking into account the change of secant modulus, 123
FRIES, R. H. *Paper* Tension and bending stress concentration factors in 'U', 'V', and opposed 'U'–'V' notches, 233
FURUKAWA, A. *Paper* Stress and strain distributions in plastically deformed notched bars, 67

GAO, Y. L. *Paper* Stress intensity factors for cracks at spherical inclusions by the boundary integral equation method, 197
GOLDAK, J. A. *Paper* Finite element analysis of weld distortion in carbon and stainless steels, 51

HILLS, D. *Paper* Stress intensity factor solutions for kinked surface cracks, 21
HUNG, Y. Y. *Paper* Direct determination of derivatives of holographically recorded displacement by an optical diffraction technique, 141
HYDE, T. H. *Paper* Creep crack growth from a semi-circular surface crack in a creep-ductile material, 1

ISHIDA, R. *Paper* Unsteady thermal stress analysis in three-dimensional problems by means of the thermoelastic displacement potential and the boundary element method, 9

JINAN XU *Paper* Stability analysis of laminated and stiffened composite shells of revolution by the finite element method, 151

KOSMATKA, J. B. *Paper* Tension and bending stress concentration factors in 'U', 'V', and opposed 'U'–'V' notches, 233

LEE, M. M. K. *Paper* An experimental study of the elastic–plastic deformation of double 'V' butt welds, 255
LEUNG, T. P. *Paper* Direct determination of derivatives of holographically recorded displacement by an optical diffraction technique, 141
LI KINGZHI *Paper* Stress intensity factor solutions for kinked surface cracks, 21
LIANG, C.-C. *Paper* Finite element simulation of the deformation of corrugated food cans during sterilization, 43
LIN, S. H. *Paper* Digital photoelastic investigation of transient thermal stresses of two interacting defects, 215
LUXMOORE, A. R. *Paper* An experimental study of the elastic–plastic deformation of double 'V' butt welds, 255

McDILL, J. M. J. *Technical Note* Finite element analysis of weld distortion in carbon and stainless steels, 51
MAJIMA, T. *Paper* Stress and strain distributions in plastically deformed notched bars, 67
MARSTON, R. E. *Paper* Internal stresses at the saddles of YT tubular joints with three different weld fillet shapes, 85
MONAGHAN, J. M. *Paper* Closed-die coining – an upper bound analysis, 131

OCHAIA, Y. *Paper* Unsteady thermal stress analysis in three-dimensional problems by means of the thermoelastic displacement potential and the boundary element method, 9
ODDY, A. S. *Technical Note* Finite element analysis of weld distortion in carbon and stainless steels, 51
OGHOUBIAN, R. *Paper* Out-of-plane bending of faceted cylinder end plates, 95
OLLERTON, E. *Paper* Internal stresses at the saddles of YT tubular joints with three different weld fillet shapes, 85

RAOOF, M. *Paper* Effect of hydrostatic pressure on strand behaviour, 75
REED, P. E. *Paper* Elastic analysis of the fixed plate impact test, 207
REES, D. W. A. *Paper* Autofrettage theory and fatigue life of open-ended cylinders, 109
REINHOLTZ, C. F. *Paper* Tension and bending stress concentration factors in 'U', 'V', and opposed 'U'–'V' notches, 233
ROBERTSON, M. D. *Paper* A design analysis of steam turbine blade roots under centrifugal loading, 185
RONALDS, B. F. *Paper* Membrane action in the beam mechanism, 241

SANFORD, R. J. *Paper* An improved strain gauge method for measuring K_{ID} for a propagating crack, 177
SEKIYA, T. *Paper* Unsteady thermal stress analysis in three-dimensional problems by means of the thermoelastic displacement potential and the boundary element method, 9
SHIN-ICHI SUZUKI *Paper* Stress analysis of cemented orthotropic lap joints, 37
SMART, J. *Paper* Out-of-plane bending of faceted cylinder end plates, 95
SMITH, S. D. *Paper* Creep crack growth from a semi-circular surface crack in creep-ductile material, 1
STANLEY, P. *Paper* Photoelastic investigation of stresses at an oblique hole in a thick flat plate under uniform axial tension, 157; *Conference Report* 6th International Conference on Pressure Vessel Technology, 55

TAN, C.L. *Paper* Stress intensity factors for cracks at spherical inclusions by the boundary integral equation method, 197
TIAN, Z.-S. *Paper* A study of stress concentrations in solids with circular holes by three-dimensional special hybrid stress finite elements, 29
TOH, C. H. *Paper* Incorporation of strain-rate-sensitive constitutive relations in the analysis of sheet metal forming, 15

WALTON, D. *Paper* A design analysis of steam turbine blade roots under centrifugal loading, 185
WANG, W. C. *Paper* Digital photoelastic investigation of transient thermal stresses of two interacting defects, 215
WARD, J. P. *Technical Note* New approximate formulae in the torsion problem, 127
WEI DING *Paper* Stability analysis of laminated and stiffened composite shells of revolution by the finite element method, 151
YUAN, K.-Y. *Paper* Finite element simulation of the deformation of corrugated food cans during sterilization, 43

Subject Index

A DESIGN ANALYSIS OF STEAM TURBINE BLADE ROOTS UNDER CONTRIFUGAL LOADING, *Paper*, 185
A REVIEW OF THE 6TH INTERNATIONAL CONFERENCE ON PRESSURE VESSEL TECHNOLOGY, SEPTEMBER 1988, BEIJING, PEOPLE'S REPUBLIC OF CHINA, *Conference Report*, 55
A STUDY OF STRESS CONCENTRATIONS IN SOLIDS WITH CIRCULAR HOLES BY THREE-DIMENSIONAL SPECIAL HYBRID STRESS FINITE ELEMENTS, *Paper*, 29
AN EXPERIMENTAL STUDY OF THE ELASTIC–PLASTIC DEFORMATION OF DOUBLE 'V' BUTT WELDS, *Paper*, 255
AN IMPROVED STRAIN GAUGE METHOD FOR MEASURING K_{ID} FOR A PROPAGATING CRACK, *Paper*, 177
Analysis, elastic, of the flexed plate impact test, 207
Analysis of sheet metal forming, 15
APPLICATION OF MOIRE INTERFEROMETRY TO A CONTACT PROBLEM, *Paper*, 229
AUTOFRETTAGE THEORY AND FATIGUE LIFE OF OPEN-ENDED CYLINDERS, *Paper*, 109

Bars, notched, 67
Beam, evaluation of stress and contact force in, 123
Beam mechanism, 241
Bending, out-of-plane, 95
Bending stress concentration factors, 233
Blade roots, steam turbine, 185
Boundary element method, 9
Boundary integral equation method, 197
Butt welds, double 'V', 255

Cans, food, 43
Carbon steel, 51
CEGB Prize, 1988, 65
Cemented orthotropic lap joints, stress analysis of, 37
Centrifugal loading, steam turbine blade roots under, 185
Circular holes, solids with, 29
CLOSED-DIE COINING – AN UPPER BOUND ANALYSIS, *Paper*, 131
Coining, closed-die, 131
Constitutive relations, strain-rate-sensitive, 15
Contact force, evaluation of, 123
Contact problem, 229
Corrugated food cans, deformation of, 43
Crack:
  propagating, 177
  surface, 1, 21
Crack growth, creep, 1
Cracks at spherical inclusions, stress intensity factors for, 197
CREEP CRACK GROWTH FROM A SEMI-CIRCULAR SURFACE CRACK IN A CREEP-DUCTILE, MATERIAL, *Paper*, 1
Creep-ductile material, 1
Cylinder end plates, faceted, 95
Cylinder, open-ended, 109

Defects, interacting, 215
Deflection, prescribed, 123
Deformation, elastic–plastic, 255
Deformation of corrugated food cans, finite element simulation of, 43
Design analysis of steam turbine blade roots under centrifugal loading, 185
Derivatives, direct determination of, of holographically recorded displacement, 141
DIGITAL PHOTOELASTIC INVESTIGATION OF TRANSIENT THERMAL STRESSES OF TWO INTERACTING DEFECTS, *Paper*, 215
DIRECT DETERMINATION OF DERIVATIVES OF HOLOGRAPHICALLY RECORDED DISPLACEMENT BY AN OPTICAL DIFFRACTION TECHNIQUE, *Paper*, 141
Double 'V' butt welds, elastic–plastic deformation of, 255

EFFECT OF HYDROSTATIC PRESSURE ON STRAND BEHAVIOUR, *Paper*, 75
EFFECT OF NUT COMPLIANCE ON SCREW THREAD LOAD DISTRIBUTION, *Paper*, 147
ELASTIC ANALYSIS OF THE FLEXED PLATE IMPACT TEST, *Paper*, 207
Elastic–plastic deformation of double 'V' butt welds, 255
End plates, faceted cylinder, 95
Evaluation of stress and contact force in a beam, 123
Experimental measurements, residual stress modelling by, 103

Faceted cylinder end plates, out-of-plane bending of, 95
Fatigue life of open-ended cylinders, 109
Finite element analysis, 103, 51
  see also Finite element method; Finite elements
FINITE ELEMENT ANALYSIS OF WELD DISTORTION IN CARBON AND STAINLESS STEELS, *Technical Note*, 51
Finite element method, 151
  see also Finite element analysis; Finite elements
FINITE ELEMENT SIMULATION OF THE DEFORMATION OF CORRUGATED FOOD CANS DURING STERILIZATION, *Paper*, 43
Finite elements, 29, 43, 51
  see also Finite element analysis; Finite element method
Flat plate, thick, 157
Flexed plate impact test, 207
Food cans, corrugated, 43
Formulae, approximate, in the torsion problem, 127

Holes:
  circular, 29
  oblique, 157
Holographically recorded displacement, 141
Hybrid stress finite elements, 29
Hydrostatic pressure, effect of, on strand behaviour, 75

Impact test, flexed plate, 207
Inclusions, spherical, 197
INCORPORATION OF THE STRAIN-RATE-SENSITIVE CONSTITUTIVE RELATIONS IN THE ANALYSIS OF SHEET METAL FORMING, *Paper*, 15
Interacting defects, transient thermal stresses of, 215
INTERNAL STRESSES AT THE SADDLES OF YT TUBULAR JOINTS WITH THREE DIFFERENT WELD FILLET SHAPES, *Paper*, 85

Joints:
  lap, 37
  tubular, 85

Kinked surface cracks, stress intensity factor solutions for, 21

Laminated and stiffened composite shells, 151
Lap joints, orthotropic, 37
Load distribution, screw thread, 147
Loading, centrifugal, 185

Measurements, experimental, 103
MEMBRANE ACTION IN THE BEAM MECHANISM, *Paper*, 241
Modelling, residual stress, 103
Moiré interferometry, 229

NEW APPROXIMATE FORMULAE IN THE TORSION PROBLEM, *Technical Note*, 127
Notched bars, plastically deformed, 67
Notches, 62, 233
Nut compliance, 147

Oblique hole, stresses at, in a thick flat plate, 157
Open-ended cylinders, fatigue life of, 109
Opposed 'U'–'V' notches, 233
Optical diffraction technique, 141
ON THE EVALUATION OF STRESS AND CONTACT FORCE IN A BEAM DUE TO A PRESCRIBED DEFLECTION, TAKING INTO ACCOUNT THE CHANGE OF SECANT MODULUS, *Technical Note*, 123
Orthotropic lap joints, cemented, 37
OUT-OF-PLANE BENDING OF FACETED CYLINDER END PLATES, *Paper*, 95

PHOTOELASTIC INVESTIGATION OF STRESSES AT AN OBLIQUE HOLE IN A THICK FLAT PLATE UNDER UNIFORM UNIAXIAL TENSION, *Paper*, 157
Photoelastic investigation, digital, 215
Plastically deformed notched bars, stress and strain distributions in, 67

Plate, flat, 157
Pressure, hydrostatic, 75
Pressure Vessel Technology, 6th International Conference on, 55
Propagating crack, measuring K_{ID} for, 177

RESIDUAL STRESS MODELLING BY EXPERIMENTAL MEASUREMENTS AND FINITE ELEMENT ANALYSIS, *Paper*, 103

Screw thread load distribution, effect of nut compliance on, 147
Secant modulus, change of, 123
Sheet metal forming, analysis of, 15
Shells of revolution, composite, 151
Solids with circular holes, stress concentrations in, 29
Spherical inclusions, cracks at, 197
STABILITY ANALYSIS OF LAMINATED AND STIFFENED COMPOSITE SHELLS OF REVOLUTION BY THE FINITE ELEMENT METHOD, *Paper*, 151
Stainless steel, 51
Steam turbine blade roots, design analysis of, 185
Steel:
  carbon, *see* carbon steel
  stainless, *see* stainless steel
Sterilization, deformation of corrugated food cans during, 43
Stiffened composite shells of revolution, 151
Strain gauge method for measuring K_{ID} for a propagating crack, improved, 177
Strain-rate-sensitive constitutive relations, 15
Strand behaviour, 75
STRESS ANALYSIS OF CEMENTED ORTHOTROPIC LAP JOINTS, *Paper*, 37
STRESS AND STRAIN DISTRIBUTIONS IN PLASTICALLY DEFORMED NOTCHED BARS, *Paper*, 67
Stress:
  evaluation of, 123
  residual, 103
Stress concentration factors, 233
Stress concentrations in solids with circular holes, 29
STRESS INTENSITY FACTOR SOLUTIONS FOR KINKED SURFACE CRACKS, *Paper*, 21
STRESS INTENSITY FACTORS FOR CRACKS AT SPHERICAL INCLUSIONS BY THE BOUNDARY INTEGRAL EQUATION METHOD, *Paper*, 197
Stresses in an oblique hole in a thick flat plate under uniform uniaxial tension, 157
Stresses:
  internal, at the saddles of YT tubular joints, 85
  thermal, 215
Surface cracks:
  kinked, 21
  semi-circular, 1

TENSION AND BENDING STRESS CONCENTRATION FACTORS IN 'U', 'V', AND OPPOSED 'U'–'V' NOTCHES, *Paper*, 233
Tension, uniaxial, 157
The 1988 CEGB Prize, 65
Thermal stresses, transient, 215
Thermoelastic displacement potential, 9
Thick flat plate under uniform uniaxial tension, 157
Three-dimensional problems, unsteady thermal stress analysis in, 9
Three-dimensional special hybrid stress finite elements, 29
Torsion, 127
Transient thermal stresses, digital photoelastic investigation of, 215
Tubular joints, YT, 85
Turbine, steam, design analysis of blade roots, 185

'U' notches, 233
Uniaxial tension, uniform, 157
UNSTEADY THERMAL STRESS ANALYSIS IN THREE-DIMENSIONAL PROBLEMS BY MEANS OF THE THERMOELASTIC DISPLACEMENT POTENTIAL AND THE BOUNDARY ELEMENT METHOD, *Paper*, 9
Upper bound analysis, 131

'V' notches, 233

Weld distortion, finite element analysis of, in carbon and stainless steels, 51
Weld fillet shapes, 85
Welds, butt, 255

YT tubular joints, internal stresses at the saddles of, 85

6th International Conference on Pressure Vessel Technology, 55
